About

The American Society for Cell Biology is an inclusive, international community of biologists studying the cell, the fundamental unit of life. ASCB members include research scientists, postdoctoral fellows, educators, and students working in a variety of settings to promote research and teach our next generation in universities, colleges and high schools, professional schools, government, industry, and public and private research institutions.

New technologies and new discoveries in molecular biology, genetics, biochemistry, and light microscopy have quickly widened the field. Cell biology has continued to expand, extending its impact on clinical medicine and pharmacology while drawing on new technologies in bioengineering, high-resolution imaging, massive data handling, and genomic sequencing.

****List rentals are prohibited from November through January.****

ASCB members are both influential and responsive. They are interested in receiving offers pertaining to: subscriptions/books/journals, devices and technology, research equipment and supplies, continuing education, seminars, conferences, laboratory supplies and equipment, and much more.
